

Clinical Lab Interfaces

Practices that use FredMed's hosted Misys Practice Management software have the ability to access patient demographic and insurance information from their Misys database when placing orders for lab testing through the following vendors.

Laboratory Corporation of America offers LabCorp Communications Manager (LCM), a user-friendly, Windows-based product that automates test ordering and result retrieval, allowing for easy management of patient test records. The LabCorp LCM software is available to your practice via an Internet solution as well as loaded on a LabCorp provided PC with laser printer, subject to qualifications.

For more information, contact **Steve Patten**, Regional Director of Sales, at **(800) 859-0391 x8729**, or e-mail to pattens@labcorp.com.

Quest Diagnostics offers Care 360™ Lab Orders and Results, a customizable internet based product that allows you to electronically order tests and receive results, eliminating the need for paper requisitions and reports. Included are advanced reporting features including cumulative graphing.

For more information, contact **Karen Delph**, Quest Diagnostics Account Sales Representative, at **(410) 737-1960** or **(800) 522-9235 x1960** toll free, or e-mail to Karen.e.delph@questdiagnostics.com.
